**WATCH THEM THRIVE.**

**LIFELINE PROTECT  
BEEF IS THE ONLY  
COLOSTRUM  
SUPPLEMENT  
MADE ESPECIALLY  
FOR BEEF CALVES.**

Harsh conditions drain energy reserves and make it hard for your newborn calves to get going. Protect Beef provides 50 grams of globulin protein, *plus* added fat and carbohydrates for the burst of energy they need to quickly stand and suckle. This added energy gives your calves the very best start, translating to added value for your operation. Feed Protect Beef to your newborn calves and then... watch them *thrive*.
